2006

Televic wins largest contract ever for supply of Conference Equipment

Televic wins large PIS contract (AGC) for French Railways

Creation of Joint Venture in China with KTK

Launch of first IP based care registration system

Mission

- To develop and manufacture a range of specialised, superior quality solutions for multimedia communication
- To create customer value through customised solutions and innovation in cutting edge technology.
- To become the n° 1 or n°2 in each BU niche market on a European level.
- To realise a sustainable profitable & international growth as an independent company

Values

- **Integrity**

Our relationships are marked by integrity. Televic wants to be a longterm partner earning respect, credibility and trust.

- **Passion**

We are proud on what we do. Our employees show this trough their positive attitude and enthusiasm.

- **Innovative**

We want to surprise our customers through our innovative approach. Innovation is the heart-beat of Televic.

- **No nonsense**

We only promise what we can realise. We stay to the point in order to deliver the expected results

Markets

To enhance growth, Televic is organised around independent BU's. While each BU has its own market focus to ensure success, their synergy create an economy of scale for the group.

- **Transport:** onboard multimedia communication systems
- **Healthcare:** networks for nurse call & care registration
- **Conference:** conferencing, interpretation and voting
- **Multimedia learning:** interactive training systems
- **Audiovisual:** Integrated AV solutions
- **Manufacturing Services:** subcontracting for third parties

Transport

- The main areas of activities are on-board passenger information solutions, passenger entertainment systems and various train control and security systems:
 - **Digital on-board Services network:**
The first ethernet-based communication backbone that complies with the requirements of redundancy, Quality of Service and ease of integration.
 - **Passenger Information Systems:**
A range of specialised PIS systems for use in trains, trams or metros
 - **Entertainment Systems:**
Digital systems to provide Audio & Video entertainment at seat.
 - **Control Systems:**
Customised electronic & mechatronic designs that provide innovative solutions for Control en Security applications in the railway industry.

Subcontracting

- Televic's strategy is to keep all aspects of manufacturing in-house in order to keep our desired level of quality, flexibility & reactivity. These manufacturing services are offered to third parties according to their specific needs.
 - **Design of test systems**
 - **Electronics manufacturing**
 - **Mechanics manufacturing**
 - **Assembly, test & package**
 - **Quality control & assistance**

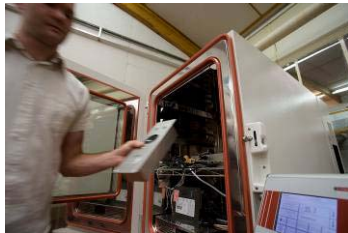

Research & Development

- In order to realise Televic's mission, the R&D department of Televic has a clear focus on innovative technologies in the area of:
 - digital audio
 - digital video
 - Wired & wireless networks
- In each of these domains, the R&D team has outstanding expertise and is continuously improving that knowledge based on research projects in collaboration with research institutes, universities and engineering schools.

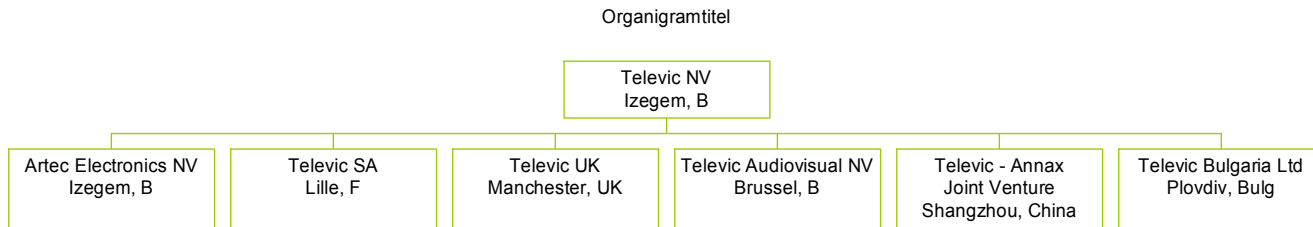

Manufacturing

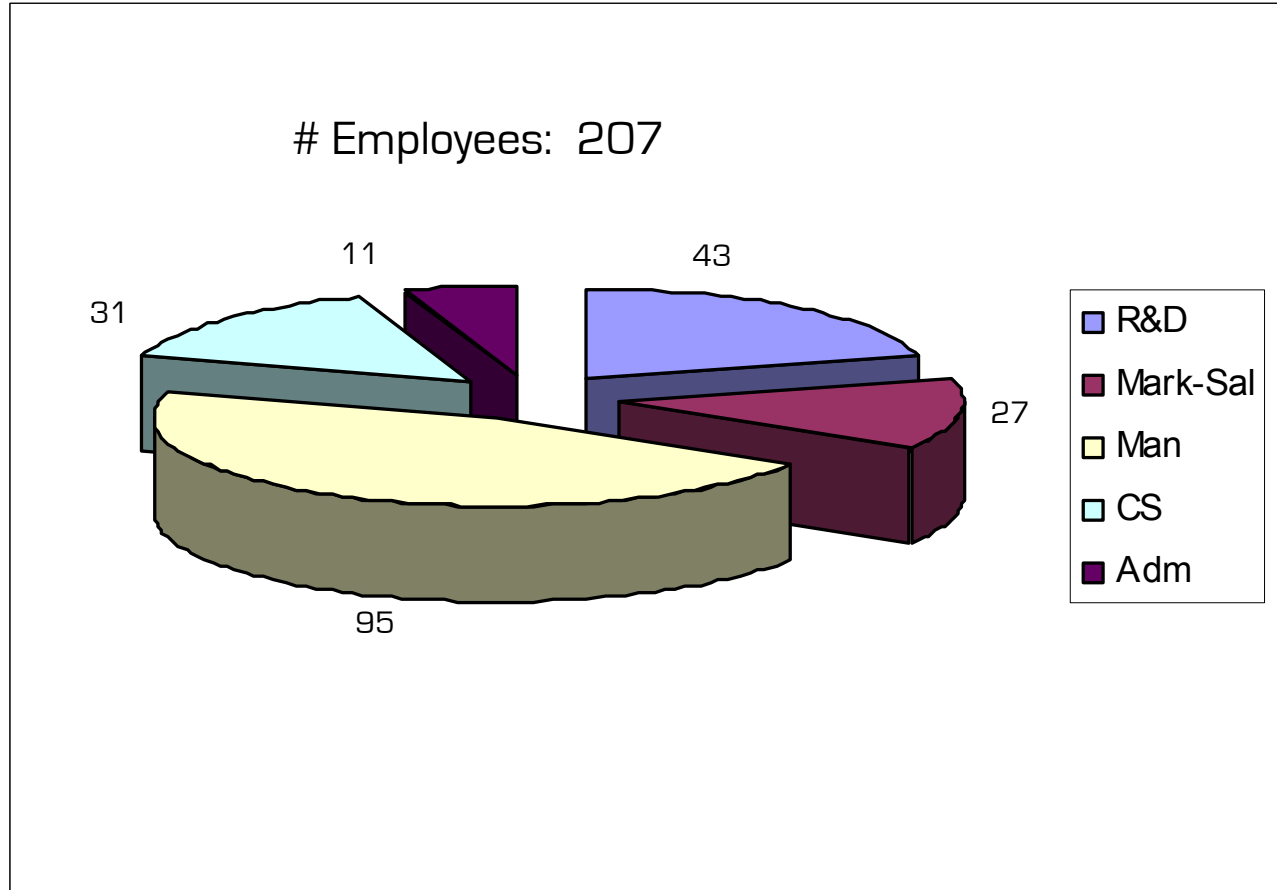

- Televic's manufacturing strategy is based upon the principle of adding value at the ideal place:
 - Assembly plant in Izegem (8500 sqm) for flexibility, first series, rush orders, ..
 - Assembly plant in Bulgaria (1700 sqm) for medium to large series
 - Selected network of Belgian subcontractors
 - International sourcing, backed by local follow-up and QC
 - QC team for internal and external manufacturing processes
 - Centralised Logistics in Izegem

Group Structure

Fact & Figures

Fact & Figures

(2005, mio Euro)

- Turnover 23.5
- R&D budget 2.5
- Equity 6

Certificates & rewards

- 2005: Most promising company of Flanders
- 2002 – 05: Among fastest growing companies in Belgium
